Dear Senator Nelson,

I am writing to express my deep concern about the Baucus healthcare bill that the Senate Finance Committee is considering. I urge you to vote against this dangerous and damaging bill in committee.

Please do not put our future at risk. Please consider the senior population in Florida and do not cut Medicare.

The projections that this bill will not add to the deficit are insincere. What good is it to not add to the deficit if you have to add taxes fines and make other cuts to accomplish that? You are simply moving debt around while you strangle our economy and prevent growth, job creation and new sources of income that will genuinely cut the deficit.

Please do not limit the deductibility of medical expenses on income taxes. The only folks that would be affected by this are the sick. This amounts to a tax on those who are sick. The reason our economy is struggling is because of misguided policies like this, and this would only further damage the working middle class families you represent.

I urge you, Senator, to take a stand for the principals that have made this country great and to not succumb to the pressure of an administration that is leading us in a dangerous direction. This health care reform is unconstitutional, economically disastrous and has a historical track record of failure everywhere it has been tried.

Thank you,
